

Features

- ❖ The visor extends from above the top of the headband to below the chin, providing full face protection while allowing room for additional PPE, dental loupes, etc.
- ❖ Removable 1mm polycarbonate visor, headband, replaceable sweatpad, and a dual elastic strap for a comfortable fit.
- ❖ Each part is available as a replacement.
- ❖ Arched gap between the headband and the top of the visor increases airflow and minimizes fogging.
- ❖ Reusable: Simple disassembly and reassembly, allowing for quick cleaning and sanitation.
- ❖ Made in the USA.

Testimonial

Endrika Hinton, Gynecologist, reports that the iMask+ Face Shield is so much better than the other things she has tried because:

1. The plane of the shield is straight - so when she has to move from examining the patient to looking at her computer screen and then back there is no distortion.
2. It is lightweight and easy to maneuver in.
3. Her clients don't think she looks like some kind of insect.
4. The peripheral vision is a lot better.
